Subject: Re: Hello from Subijoy - visiting India-

To: ROW-gmail <rowfoundation@gmail.com>, .....

Hello from North India - New Delhi, Rishikesh, Uttarakhand, Dehradun area....

Visited the Ganges River in Rishikesh area (part of the headwaters of the Ganges). See a picture from there..

The water clarity and TDS (Total Dissolved Solids) plus Dissolved Oxygen etc. were measured by our Rivers of the World (<https://rowfoundation.org>) team and they were all quite good (NTU 5.0, TDS 80.0 ppm, DO ~6.0 ).

We (3-Engineers and one Water Scientist) take off Jan 10th until Jan 16th by road along the Yamuna River for a 882 KM R/T study of the STPs (*Sewage Treatment Plants*) and WQ (*water quality*) of the Yamuna River from New Delhi area all the way to the Chambal River confluence in Madhya Pradesh (441 KM -one way), covering small towns (Gokul, Goverdhan etc.) plus Mathura, Vrindavan, Agra

Kalyanpur, Etawah etc. by road (car) walk, boat etc. as needed. 😊💧

Attached pdf shows our path of travel and a few overnight stopping points.

Sorry that I won't be able to attend this meeting. Keep me posted.  
I plan to be in India until the end of April, 2022.

Regards,

Subijoy
